

## SHADOW FORM FOR OBSERVER'S POST

Name:	Age:	Sex:	
Current Address:			
Tel. Nos:		Email:	
<b>Work Details:</b>			
Degrees	Year	College	University
Experience (list e.g. conventional, ultrasound, CT, MRI, etc):			
Period of observership (months/weeks):			
Why do you want to do this observership?			

**Terms:**

What You Might Hope to Gain:

1. Learning how to approach cases, predominantly cardiothoracic, some musculoskeletal and complex multi-system cases that come for opinions
2. Understanding the decision making that goes behind biopsies and interventions
3. Observing CT guided biopsies and interventions
4. Learning practical day-to-day reporting, how to give only one or two diagnoses and how to avoid terms like “advise clinical correlation”
5. Understanding the difference between heuristic and deliberate thinking in real-life situations
6. Learning how to communicate with doctors and patients

The Basic Plan:

1. Between 1 to 4 weeks
2. Five days a week
3. No payment to you, no charges from you
4. You have to make your own arrangements for stay and travel
5. Certificate of attendance at the end of the course
6. Attendance during the entire half-day session in the first half of the day from start to end with Dr. Bhavin Jankharia mandatory
7. Not more than 2 observers at any given time
8. All teaching and learning will only be case-based. No didactic lectures or teaching
9. No age bar
